TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: 018  
Session date: 11 JUL 88  
Start time: 1115  
End time: 1225  
Mode of operations: SOL0  
PI: None  
AV: None

2. (S-SS) Cuing: 6 digit encrypted coordinates: 641501/880782. (Structure located in 17 Jun 88 session).

3. (S-SS) Tasking: Describe the interior of the structure.

4. (S-SS) Results:

a. The interior of the structure contains at least the following rooms (see sketch, page 9 of the transcript):

1) A large room which mainly contains chairs.

2) A room to the side of the large room which is mainly white and yellow in color and may contain some form of machinery or cabinetry (see sketch, page 7).

3) A glassed-in room off to the side of the second room which gives strong impressions of being a type of "clean" room.

b. Activities within the structure include:

1) There are people in the large room (4.a.1, above) who are idle. These people are all male, and gave repeated impressions of being in bathrobes or very leisure clothes. There is a large, round, white "thing" on one wall beside a door which leads to the side room (see sketch, page 4).

2) I could find no signs of people in the side room (4.a.2, above), but there was a loud, repetitive metallic noise (AOL: like a ratchet, or a slipping chain drive).

3) The "clean" room contained people who were dressed in loose-fitting clothing, floppy hats, and white gloves. They were hurrying purposefully back and forth. Their activity appeared to center around a small "mechanism" and a long table. The last impression before session end was that of a nude male lying on the table, evidently unconscious, with one of the workers handing the "mechanism" to another who was standing over this man.
